

Security Operations & Incident Management

Why is Security operations and incident management important for UK Children's Rights Charity employees?

Child Protection Responsibility:

- Safeguard personal information.
- Ensure children's safety.

Cyber Threat Awareness:

- Constantly evolving threats.

Essential Security Measures:

- Implement robust security operations.
- Establish incident management programs.

Proactive Incident Handling:

- Identify potential incidents.
- Prevent security breaches.

SECURITY OPERATIONS

What is a Security Operations?

Security Operations is essential for organizations to proactively address evolving cyber threats. By continuously monitoring, detecting, and responding to security incidents, organizations can minimize the impact of breaches, protect sensitive data, and maintain the trust of their stakeholders.

Examples of Security Incidents:

- **Data Breaches**
- **Malware Attacks**
- **Phishing Scams**
- **Denial-of-Service (DoS) Attacks**
- **Man-in-the-Middle Attacks**

Why it is important for employees of the Charity to be aware of security operations and incident management?

- *Protect children's privacy and safety*
- *Protect the charity's reputation*
- *Comply with legal and regulatory requirements*
- *Create a culture of security*
- *Protect the charity's assets*

As employees of the UK Children's Rights Charity, it is our responsibility to protect the children we serve, our staff, and our organization's data and assets.

By understanding SOIM principles and practices, we can help to create a safer and more secure environment for everyone.

IDENTIFYING INFORMATION

Identification includes complying with relevant data protection laws and regulations, implementing secure information systems, and providing training to staff on data security practices. Regular audits and assessments can help ensure that security operations are effective and aligned with the organization's mission and legal obligations.

Types of Information's:

- Child Records
- Donor Information
- Legal and Compliance Documents
- Financial Data
- Communication Records
- Monitoring and Surveillance Data
- Incident and Case Management Data

DATA CLASSIFICATION

Data classification is the process of organizing data into categories based on its sensitivity and importance. This helps organizations protect sensitive information from unauthorized access, loss, or misuse.

Data Classification Levels

- **Public:** Information intended for public access.
- **Internal:** Information restricted to internal use within the organization.
- **Confidential:** Sensitive information with restricted access.
- **Restricted:** Highly sensitive information with limited access.

PASSWORD SECURITY

Best Practices for Secure Passwords

- Use Complex Passwords: Utilize a mix of uppercase and lowercase letters, numbers, and symbols.
- Two-Factor Authentication (2FA): Enable 2FA whenever possible.
- Regular Updates:
 - i. Change passwords regularly.
 - ii. Educate on recognizing and avoiding phishing attempts.
- Password Length:
 - i. Aim for a minimum of 12 characters.
 - ii. Consider using passphrases.
- Unique Passwords:
 - i. Employ different passwords for each account.
 - ii. Emphasize the importance of a password manager.

DEVICE SECURITY

Ensuring Device Security

- **Strong Authentication:**
 - Implement strong authentication methods.
 - Enable device encryption.
- **Network and Firewall Protection:**
 - Use secure Wi-Fi connections.
 - Enable firewalls for added security.
- **Backup and Remote Features:**
 - Regularly back up important data.
 - Enable remote wipe and tracking features.
- **Keep Software Updated:**
 - Regularly update the operating system, firmware, and applications

Common Phishing Techniques To Be Aware of

Recognizing Phishing Techniques

- Email Spoofing
- Deceptive Links
- Social Engineering
- Urgency and Threats
- Misspellings and Grammatical Errors

INCIDENT MANAGEMENT

Importance of Reporting Security Incidents

- Mitigate impact as soon as possible, preventing extra damage from being inflicted
- Reporting allows cyber security experts to communicate with each other to create better plans if a similar attack were to occur again

How to Report Incidents to the Appropriate Authorities

- Report through the Action Fraud website
- However, if you are experiencing a live cyber attack, call their number: **0300 123 2040**. This will ensure that the attack will be dealt with quicker.
- In the case of a data breach, you must report it to Action Fraud and the Information Commissioner's Office within 72 hours.

Potential Impact of Security Incidents

- Data breaches through: phishing or a malware attack
- Denial-of-service attack
- Deletion of the data in exchange for money
- Website could be shut down or made difficult to access
- Decrease in donations

Tips on Preventing Security Incidents

- Physical barriers preventing non-employees from accessing charity computers.
- However, it is not entirely possible to prevent security incidents and incidents should be reported immediately.
- Back up your data regularly. In the event of a security incident, having a recent backup of your data can help you minimize the damage.
- Work on company-issued and company approved computers.
